

Friday 19th January 2018

This week we have been thinking about the four seasons and how we can tell what season we are in. We have focused on the clothes that we wear at different times of the year and the children have used their phonic knowledge to label items. They have also continued to work on their sentence writing. In maths we have been investigating 2d shape. The children are more confident in naming basic shapes and describing their properties. We will move on to naming and recognising shapes with more than 4 sides.

Letters and Sounds We have been revising the digraphs 'sh', 'ch' and 'th' and learning how to read the words in phase 3.

Next week we will learning about penguins and writing factual sentences about them. In maths we will focusing on addition.

Banana penguins We are hoping to be able to make these next week...

Please could your child bring in a banana to use for this activity on **Thursday?**

Displays If you haven't had a chance to pop into the classroom recently then please have a look on our class page on the school website. We have taken some photographs of the children's fantastic artwork that are on display in our classroom and in the corridor.

Weekly challenge Choose an activity to complete from the 'Polar Regions Home Learning Sheet'. We look forward to sharing what the children do at home during **Show and Tell on Thursday**.

With best wishes,

Alicia Warren
