# 1. Decarbonisation and Energy Efficiency

Calculating and taking actions to reduce carbon emissions and becoming more energy efficient

ENERGY – BUILDINGS AND RETROFIT				
ACTION	TIMEFRAME	STAKEHOLDERS	NOTES	TRACKER
<i>Recommended actions listed below – during the workshop, keep or delete rows to suit your setting; or add in your own actions in blank rows</i>				
<b>Install a smart meter</b> Contact your energy and/or water supplier to get a smart meter installed. This is an important first step to <a href="#">get data to track consumption</a> and is needed before you can sign up to energy usage analytics platforms, e.g. <a href="#">Energy Sparks</a> .	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Andy Hall</b>  <b>Sarah Martin</b>	There is a <a href="#">guide here</a> with smart meter information, that helps you to identify what kind of meter you have. If you already have a smart meter, check with your energy provider if you have half hourly meter readings – upgrade if not. <ul style="list-style-type: none"> <li>Contact energy provider for Smart Meter</li> </ul>	
<b>★ Optimise your BMS/BEMS settings and ensure your heating and hot water systems have efficient timings and temperatures set</b> 18°C is the <a href="#">general recommendation</a> for classroom temperatures, whilst hot water coming out of taps should be no higher than 43°C (stored at 60°C). Experiment with your heating schedule while maintaining comfort – running it one hour less per day or reducing temperatures by 1 degree can cut annual heating costs by 5–10%, <a href="#">according to the DfE</a> .	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Andy Hall</b>	There are some resources and activities around this on the Energy Sparks website <a href="#">here</a> .  Check the timings of the underfloor heating – can usually be switched off by lunchtime at the latest, as it takes a long time to cool down. <ul style="list-style-type: none"> <li>(Computer that manages the boiler system)</li> </ul>	
<b>Install TRVs on radiators</b> Install thermostatic radiator valves (TRVs). These will maintain the room at a set temperature and allow local control of heating. These can be easily retrofitted on most existing radiators.	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Andy Hall</b>	<ul style="list-style-type: none"> <li>Do we have these in school?</li> </ul>	
<b>Investigate the potential for solar panels</b>	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Andy Hall</b>	Let's Go Guide available	

Find out who you need permission from and contact solar providers to check the suitability of your roof spaces and the financial models available (direct purchase, lease, community energy). Aim to compare approaches from at least three different providers to check you are getting options that work well for your setting. Providers we suggest checking with: <a href="#">Solar for Schools</a> & <a href="#">Eden Sustainable</a> .

ENERGY – BEHAVIOURAL CHANGE				
ACTION	TIMEFRAME	STAKEHOLDERS	NOTES	TRACKER
<i>Recommended actions listed below – during the workshop, keep or delete rows to suit your setting; or add in your own actions in blank rows</i>				
<b>Incentivise students to address energy usage</b> Proactively engage and empower the student body to take a lead in promoting and implementing energy efficient behaviour changes to help save costs, reduce emissions, and make their setting more sustainable. Incentivise engagement through inter-class competitions and/or eco awards, or by electing school energy champions. <a href="#">LASER Energy</a> have a <a href="#">School Energy Action Hub</a> filled with free energy-saving resources for primary and secondary school pupils.	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Alicia Warren</b>  <b>Eco Heroes</b>	Energy Sparks have some good ideas and examples <a href="#">here</a> .  Energy audit worksheets <a href="#">here</a> and <a href="#">here</a> .  <ul style="list-style-type: none"> <li>Eco Heroes working through actions during weekly meetings.</li> </ul>	
<b>Take part in a switch off campaign</b> Take part in a switch off campaign, e.g. <a href="#">Switch Off Fortnight</a> . Aim for 10% reduction of energy use (the typical amount saved by participating schools). Running campaigns before the holiday period (such as a summer switch-down) can lead to reduced energy use over the holiday period.	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Alicia Warren</b>  <b>Sarah Martin</b>  <b>Andy Hall</b>  <b>All staff</b>	<ul style="list-style-type: none"> <li>Holiday switch off materials shared but need to monitor that the switch off is happening.</li> <li>Eco Heroes are using green and red dot stickers to indicate items that can be (and should be) switched off</li> </ul>	
<b>Monitor energy use on a regular basis through dedicated platforms</b> Use an energy monitoring platform (e.g. <a href="#">Energy Sparks</a> ) to visualise and understand your energy usage. Use the data to look for patterns in day-to-day energy consumption	<b>Start: 9.25</b> <b>Review: 7.26</b>		Energy Sparks report average savings for secondary schools in 23/24 of £21,0000 per year.  Energy Sparks report average savings for primary schools in 23/24 of £5,000 per year.	

and assess your energy baseload (how much energy you use continually). Armed with this information, you can decide where and when is best to target energy savings. If you are already sending your energy data to your provider, get in touch with them and ask them for access.			There is a pupil dashboard so students can get involved with monitoring and understanding energy usage, bills, and savings.  Energy Sparks host regular <a href="#">online induction sessions</a> for different roles within schools to ensure that schools can maximise their use of the platform.	
<b>Implement a power down strategy for electrical devices and appliances</b>  Implement power-down strategies across the school, such as sleep and automatic shutdown settings on computers, projectors, and smart boards, and switching off scanners and printers overnight. You can use a mix of automatic (e.g. timer-controlled switches) and manual shutdown approaches depending on need.	<b>Start: 9.25</b> <b>Review: 7.26</b>		Energy Sparks have some <a href="#">editable checklists</a> you can use to create end of day/week/term checklists for classrooms and other areas	

FOOD				
ACTION	TIMEFRAME	STAKEHOLDERS	NOTES	TRACKER
<i>Recommended actions listed below – during the workshop, keep or delete rows to suit your setting; or add in your own actions in blank rows</i>				
<b>Arrange a menu consultation through an external organisation e.g. <a href="#">ProVeg</a></b>  Considering where and how plant-based meals are displayed on menus can reduce bias against these options, e.g. by making the vegetarian offer the default or first in the list. Your Advisor can send off your menu to <a href="#">ProVeg</a> for a free menu consultation / advice on this. Engaging your catering team or provider with this is a great way to bring them on board with your sustainability efforts.	<b>Start: 9.25</b> <b>Review: 7.26</b>	<b>Matt (Aspens)</b>  <b>Alicia Warren</b>	<ul style="list-style-type: none"> <li>• Speak to Matt about 'Meat-Free' days and options</li> <li>• Supporting local farmers but decreasing number of days meat is on offer?</li> </ul>	
<b>Increase the number of planet friendly, meat-free options on offer every day</b>  Increase your daily plant-based and vegetarian offers. or jacket potato offerings, adding some tasty and interesting meat substitutes will make switching from meat easy and appealing!				
<b>Weigh food waste from kitchen and plates, share results, and set a target to reduce this</b> <p>Get your students involved in daily weigh-ins of food waste as part of their curriculum or eco-club activities to enhance their understanding of the scale of food wastage. Feed findings back to your school caterer and catering staff to make necessary changes to dishes/menu. Sharing the results with teaching staff, pupils and the wider school community can motivate everyone to reduce their food waste even further.</p>	<b>Start: 9.25</b> <b>Review: 7.26</b>		<ul style="list-style-type: none"> <li>Food waste is collected at the end of each lunch session and weighed</li> <li>Eco Heroes to help Matt do this for one week and report back to the rest of the school – discussion about portion sizes, eating your meal</li> <li>Different buckets for different classes – competition for the least waste?</li> <li>Set targets for the school to reduce food waste</li> <li>What can we make with the waste (from the prep stage)? – Aspens workshop</li> </ul>	
<b>Start or improve composting and food waste facilities on-site</b> <p>Set up or improve composting for small items like snack-time fruit, as a supplement to your main regular food waste collection. Composting is a great educational tool for engaging students! To get started, ask your school community for unwanted compost bins.</p>	<b>Start: 9.25</b> <b>Review: 7.26</b>		<ul style="list-style-type: none"> <li>Food waste bins set up in staff room, Nursery and Reception Classrooms</li> </ul>

<b>Run active travel campaigns</b> Participate in annual Active Travel Campaigns. Your CAA can provide a list of different options (including Living Streets' <a href="#">Wow campaign</a> and Sustrans' <a href="#">Big Walk and Wheel</a> ). Aim for these events to trigger a permanent shift to sustainable travel from students who live locally enough to do so. Facilitate walking and cycling to school by establishing Park & Stride or Walking Bus initiatives. ## 2. Climate adaptation and resilience

Taking actions to reduce the risk of flooding and overheating and to future-proof scarce resources for potential shortages

ADAPTATION AND RESILIENCE				
ACTION	TIMEFRAME	STAKEHOLDERS	NOTES	TRACKER
<i>Recommended actions listed below – during the workshop, keep or delete rows to suit your setting; or add in your own actions in blank rows</i>				
<b>Conduct a climate resilience audit</b> Conduct a climate resilience audit of the school site, e.g. To check all windows and blind open and close, guttering, planting etc. <a href="#">The Climate Ready School Grounds survey</a> from Learning Through Landscapes covers all weather conditions and involves students' opinions of their grounds.	<b>Start: 9.25</b> <b>Review: 7.26</b>		School Grounds survey to be completed by Eco Hero team

<i>Recommended actions listed below – during the workshop, keep or delete rows to suit your setting; or add in your own actions in blank rows</i>				
<b>Complete a curriculum audit</b> Complete a curriculum audit to understand how and where sustainability currently features in your curriculum as well as where there are gaps. This may focus on topics as a whole or individual lessons across all subject areas. Online resources such as <a href="#">Map The Curriculum</a> may be helpful for this.	<b>Start: 9.25</b> <b>Review: 7.26</b>		<b>Primary:</b> Down Ampney school in Cirencester have a great example of how they have included sustainability into their curriculum – it's on their website <a href="#">here</a> .  <a href="#">Natural Curriculum</a> have some lovely Morning Starters and other curriculum resources using nature. <ul style="list-style-type: none"> <li>• Written in to Curriculum</li> <li>• Applied for Grant and partnership with Royal Society to enhance curriculum offer</li> </ul>	
<b>Amend your curriculum to incorporate sustainability</b> Amend your curriculum to include stronger links to climate change and sustainability. This could be a total refresh, a bit of tweaking, drop down days or simply adding extra assemblies. <a href="#">Teach the Future</a> , Royal Meteorological Society ( <a href="#">Curriculum for Climate Literacy</a> ) and the <a href="#">MoEE</a> have amazing resources on how to weave sustainability throughout your curriculum.	<b>Start: 9.25</b> <b>Review: 7.26</b>			
<b>Survey staff on how they feel about teaching sustainability issues</b>	<b>Start: 9.25</b> <b>Review: 7.26</b>			

Conduct a survey to understand staff capability to teach sustainability and use this to identify any support needed. This might include asking them to rate their knowledge and confidence about the causes and effects of climate change, as well as the ability to navigate potentially difficult conversations with pupils including eco-anxiety. Let's Go Zero have a <a href="#">template survey</a> you can use.				
<b>Create an environment where lessons can be taught outside in all subjects</b>  Improve outdoor learning and encourage creative pedagogy that enables students to connect with nature and the local community. Set up regular opportunities to learn in nature across all areas of the curriculum. You can get support and advice from the <a href="#">Forest School Association</a> , <a href="#">Learning Through Landscapes</a> or the <a href="#">National Education Nature Park</a> .	<b>Start: 9.25</b> <b>Review: 7.26</b>		Outdoor learning/forest school  Active maths and literacy  Art  Outdoor classroom  Science garden development
