

St Minver School

Head of School: Mrs J Rodwell

Monday 17th May 2021

This week we are going to be learning all about worms! On Friday we set up our wormery and are looking forward to investigating and observing how worms live and move in the soil. Our class caterpillars are still going strong and over the weekend they have formed their chrysalides. As part of our topic this half term we have also been thinking about our incredible bodies and comparing them to the minibeasts we are learning about. Are two legs better than none? Do we need wings? We have also been extending our vocabulary with some excellent new words. Can the children tell you about the following words?

- metamorphosis
- proboscis
- arachnid
- invertebrate

We also love to find out about the collective nouns for animals and insects... a clutter of spiders, a flutter of butterflies, a walk of snails, an army of caterpillars, a loveliness of ladybirds. It would be great if the children could find out and tell me what a group of worms is called.

I hope that you all have a great week. Please get in touch if you have any queries or concerns.

With kind regards,

Mrs Warren
